

Vaccines

Know What You Need

ALL adults need vaccines to protect their health against common diseases that can be serious. There are four things to consider in determining which vaccines are recommended for you:

1. Vaccines **every** adult needs
2. Your **age**
3. Your **health conditions, lifestyle, or job**
4. **International travel**

Talk to your healthcare professional at your next visit about which vaccines are right for you!

1. Vaccines every adult needs:

Influenza (flu)	WHO? All adults, including pregnant women during any trimester HOW OFTEN? Every flu season
Tetanus, diphtheria, and pertussis (whooping cough) (Tdap)	WHO? All adults who have never received the Tdap vaccine and pregnant women HOW OFTEN? Everyone needs Tdap one time, no matter when you got your last tetanus (Td) vaccine. Pregnant women need a Tdap dose during every pregnancy. Td vaccine, to protect against tetanus and diphtheria, is needed every 10 years.
Tetanus and diphtheria (Td)	

2. Vaccines you may need based on your age:

Human papillomavirus (HPV) <i>Recommended if you haven't received the full 3-shot series</i>	WHO? Females age 26 or younger Males age 21 or younger Males age 26 or younger who have weakened immune systems or HIV, or have sex with men HOW OFTEN? One time series of three doses
Measles, mumps, rubella (MMR)* <i>Recommended as a catch up if you didn't receive as a child</i>	WHO? Adults born in the United States in 1957 or later who have not received MMR vaccine, or who had lab tests that showed they are not immune to measles, mumps, and rubella HOW OFTEN? One time for most adults; however certain people like college students, international travelers, or healthcare professionals, should get two doses.
Pneumococcal (pneumonia, meningitis)	WHO? Adults 65 or older HOW OFTEN? One time
Shingles (Zoster)	WHO? Adults 60 or older HOW OFTEN? One time
Varicella (chickenpox)* <i>Recommended as a catch up if you didn't receive as a child</i>	WHO? Adults born in the United States in 1980 or later who never had two doses of the vaccine or never had chickenpox HOW OFTEN? One time series of two doses

*Live vaccines should not be given to pregnant women or people who have a very weakened immune system. That includes people with a CD4 count less than 200.

**DON'T WAIT.
VACCINATE!**

3. Some vaccines you may need depending on existing health conditions, lifestyle, or job:

This chart shows some common vaccines for adults but there may be other vaccines you need. Your healthcare professional will use the more detailed adult vaccine schedule to ensure you receive all the vaccines recommended for you.

	Hepatitis A Series	Hepatitis B Series	Meningococcal	Pneumococcal polysaccharide	PCV13 plus polysaccharide pneumococcal vaccines
Weakened immune system				●	●
HIV		●		●	●
No spleen or spleen does not work well			●	●	●
Heart disease				●	
Chronic lung disease (for example COPD or Asthma)				●	
Diabetes: Type 1 or type 2		●		●	
Chronic kidney disease or kidney failure		●		●	●
Chronic liver disease	●	●		●	
Chronic alcoholism				●	
Men who have sex with men	●	●			
College freshman living in residence halls			●		
Healthcare workers	In addition to the vaccines all adults need, healthcare workers are also recommended to get the Hepatitis B series, MMR, and varicella vaccines. For more information: http://www.cdc.gov/mmwr/preview/mmwrhtml/rr6007a1.htm				

4. Vaccines you may need depending on international travel:

There may be additional vaccines you need depending on where you are traveling. To find out what vaccines you may need and to find a travel clinic that offers vaccines, go to www.cdc.gov/travel.
